

PHILOSOPHY (PHI)

PHI 467 Bioethics and Healthcare Professions 3 Units

This course will examine the ethical issues raised by modern advances in health care and biological research. Attention will be given to the language of bioethics, important philosophical and theological approaches, and socio-cultural implications. Special foci may include clinical nursing ethics, business ethics in a healthcare context, or other topics as appropriate. Prerequisite: CTHL 101 or CTHL 200 or THL 202 or NTHL 101 or NTHL 202.
