Professional Programs and Minors

Concordia University offers a variety of professional programs and professional minors designed to prepare students for either full-time church or secular vocations. Each professional program or professional minor is built upon an academic major and requires additional professional courses and experiences which serve to prepare students

for entrance into a profession and/or for graduate education that will further serve to equip students for their chosen career.

General admission to the university does not constitute admission to a professional program or professional minor. Students are not required to enter a professional program or professional minor and may choose to graduate with a “Liberal Arts” designation. Until they apply to a program or minor, all students are designated as liberal arts students. Students may apply to a professional program or professional minor at any time and, if they meet entry standards, will be classified as “Conditional” or “Accepted” in that program or minor, depending on their qualifications. Should students not be admitted to a program or minor, or not continue in a program or minor for whatever reason, they are returned to the liberal arts status. The following professional programs and professional minors are available.
